Subject: RE: Buckeye Bank mtg at 10am today

Hey, we had a follow-up call this afternoon where I tried to persuade my colleagues at the Corps and DFW that a single bank makes much more sense than two separate banks. One question that I was wondering about was the 404 riparian wetlands at the Dry Creek site. Are these all going to be Waters of the US (ie. 404 waters) or is there a subsection that will be reserved for just 1600 permits? One way out of this mess might be to forgo any DFW credits at Dry Creek and still wrap both sites into one instrument. Angela seemed amenable to this idea...

Also, FYI - DFW staff in LA County pushed for both Peterson Ranch and Elizabeth Lake to be one instrument despite being several miles apart (and completely different habitat types). We just commented on the Prospectus for this project. This is a WRA project. I pointed this out to Angela on our follow-up call.

Good Luck and am truly sorry for the poor government service you received this morning. It's days like these when I think I need to get a new job...

-Eric
